

MOBILETE Terminal Application Certified Hardware

MOBILETE brings the complete capabilities of data collection to the mobile environment from Point of Sale with price look-up, markdowns, discounts, split tendering, and credit card processing to receiving, transfers, inventory, and ticketing.

MOBILETE is a WinCE application that can operate in Batch, LAN, WAN, and RF modes to meet all your mobile POS needs.

In a store, in an exhibit hall, on the sidewalk, or in a salesman's pocket, MOBILETE is Real Mobile, Real Fast.

Touch screen, dynamic keys, scanning MSR, and product picture display are some of the functions that MOBILETE brings to the end user.

On the warehouse floor, in the truck, or at the point of delivery, MOBILETE provides the flexibility to support the many demands that mobile devices are created to resolve.

As a hardware independent product, MOBILETE can be combined with the "best of breed" handheld devices, mobile printers, and kiosk machines to form the ideal solution for the vertical environment to be addressed.

This truly makes MOBILETE a multifunction workhorse designed to increase productivity and profit in all environments.

Certified Platforms

The broad range of business criteria considered in the development of **MOBILETE**, when combined with the “best of breed” handheld products, forms a complete solution. This truly makes **MOBILETE** a multifunction workhorse designed to increase productivity and profit throughout the supply chain.
