

MOBILETY

portable processing made easy

www.pssproducts.com

MOBILEeNFORCEMENT brings the complete capabilities of a laptop to parking violation enforcement.

MOBILEeNFORCEMENT assures accuracy while increasing efficiency, delivering a quick return on investment.

MOBILEeNFORCEMENT can offer a complete set of data capture options such as photo capture, multiple violation fine calculation, digital audio notation, and GPS location coordinates.

MOBILEeNFORCEMENT provides for weather-resistant violation ticket generation.

MOBILEeNFORCEMENT data capture items in detail:

Badge Scan
License Scan
GPS/Location Capture
Records Tracking

Meter ID Capture
Audio Note
Violation Photo
Signature Capture

Violation Look-Up
Fee Calculation
Hard Ticket Generation

Benefits:

- Automation reduces manual entry, improves speed, accuracy, and information capture.
- Database capture of all information provides for a highly detailed database, allowing for a myriad of reports including route productivity, repeat offender, and scofflaw.
- GPS positioning and camera capture of violation reduce dispute capability of violator.
- Optional real time of batch processing.
- Custom citation layouts.

The process flow:

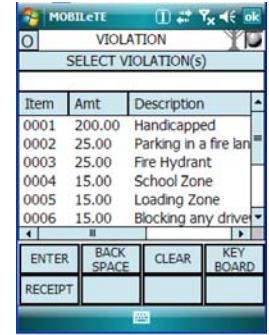

Enforcement officer equipped with PDT and printer.

Enters license plate number.

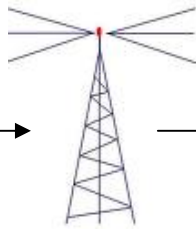

Takes picture of the violation.

Selects the appropriate violation.

Records the meter ID and/or the violation location coordinates.

Optionally uses Wi-Fi broadband to transmit the violation.

Produces a hard copy of the violation ticket complete with fees.

Data is integrated into the policy tracking system.

Hardware Options
